### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 42, 44, 50, 55, 58 and 60 are rejected under 35 U.S.C. 102(b) as being anticipated by Koros et al. (US Patent Number 5,273,519). Koros et al. disclose an apparatus for connecting to an orthopedic implant comprising a base comprising an upper base portion and a lower base portion (see various embodiments of figures 2, 19 and 23) and having a relatively forward end and a relatively rearward a slidable shaft, e.g. 30, connected to the base, wherein the shaft 30 includes an elongated portion, e.g. 172, a pivotable plate, e.g. 20 having an opening, e.g. 21, a sleeve, e.g. 25, 26 and 27, at least partially surrounding the shaft and being slidable along the shaft 30, a ratchet mechanism (see figures 10 and 11) connected to the base and the sleeve 25/26/27, a stop connected to the base comprising at least one paw, e.g. 66 that is pivotable between at least one position connected to the ratchet mechanism and the position disengaged from the ratchet mechanism and a handle, e.g. 10, 11, 50 including a actuator, e.g. 40, movably/pivotably connected to the base, wherein the actuator operates the ratchet mechanism when the actuator is moved relative to the base. The handle further comprises a rigid stock, e.g. 10.

With regard to the statement of intended use and other functional statements, they do not impose any structural limitations on the claims distinguishable over Koros et al., which is capable of being used as claimed if one so desires to do so. *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

### ***Allowable Subject Matter***

Claims 43, 45-49, 51-54, 56 and 57 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 3-31, 59 and 61-70 are allowed.

### ***Response to Arguments***

Applicant's arguments, filed 06/19/2007, with respect to claims 1-41 have been fully considered and are persuasive. The rejection of these claims has been withdrawn.

Applicant's arguments with respect to claims 42, 55, 58 and 60 have been considered but are moot in view of the new ground(s) of rejection (different interpretation of Koros et al.).

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael B. Priddy whose telephone number is 571-272-2243. The examiner can normally be reached on M-F.
